

This is a variant of the Wrap line of machines.

#### FEATURE LIST

- **Unique conveyor design incorporating side transfer sections** - this allows machine to be pushed up against existing conveyor line and operate without breaking the line. When not in use simply wheel it away to another location.
- **Zero Down Time - Non Stop** operation
- **Stack/Tower Light** with operator friendly logic - flashing / on / off light sequence
- Uses the reliable **Compact Labelling Head and controller**
- **Motorised Rewind Units** - using AC Brushless motors for no maintenance to rewind full roll of backing paper
- **Heavy duty Vacuum Generator**
- **Full Synchronised speeds** - incorporating German Stepper Motors on the labelling heads and AC Brushless motors on all other drives
- Bottle Spacer Product Spacing with Bank-up sensor
- **Robust, heavy duty construction** – the machine is designed for years of trouble free and maintenance free productivity. No lubrication or awkward adjustments are required
- **Easy to set up** – within a couple of minutes a new job can be set up and running, increasing productivity immediately
- **Simple to Operate** with the built in alarms and Compact controller
- **Economical design** incorporating high reliability and low maintenance
