

COMPACT MANUAL LABEL DISPENSER: C-150

DESCRIPTION

Capable of increasing or assisting hand labelling by at least 50%, the C-150 is an Electric Label Dispenser, manually operated by lifting the pre-dispensed label, as the label is removed a motor is activated. The remaining attached part of the label is dispensed and the next label is ready for pickup. While this is happening the backing paper is being rewound for safety and quick, easy disposal.

FEATURE LIST

- Eliminate RSI Risk
- Increase manual labeling output
- Increase productivity by 50%
- Improve labelling quality
- Minimise label waste
- Industrially robust - Food Grade - Stainless Steel construction
- Suitable for Die-Cut or But-Cut labels
- Easy to operate
- Quick to Set-up
- Portable
- Economical design incorporating high reliability and low maintenance

TECHNICAL DATA

SPECIFICATIONS

Base Plate Size	330mm Sq
Overall Dim'	W350xD500xH280
Power Requirements	240V
Weight	8kg
Gross Carton Dim's	W350xD350xH300 - 10Kg's

CAPACITY

Min' Label Size	20mm x 20mm
Max' Label Size	W150mm x L1000mm
Max' Roll Diameter	260mm

NOTES:
